New 7 Especially Turkey's Most Innovative Glass Balcony Systems

Always the newest Always for the better...

About Us

Founded in 1986, USS has stepped into the sector with the production of plastic doors and windows and accessories. With the advances in the door and window sector, USS production processes have also been developed and product diversity has been increased. USS manufactures its products with its experienced staff in its factory with a closed area of 9.000 m² and a sales store of 2.000 m² using advanced technology. With the continuous investments made in line with the intense demand in the national and international market, new machine parks and mould systems have been added to produce patented and quality products in the sector. In this way, the development of the technology of production processes has increased the production capacity and product quality, while minimising the errors that may occur in mechanical systems.

VASISTAS DRIVING

Open in one motion!

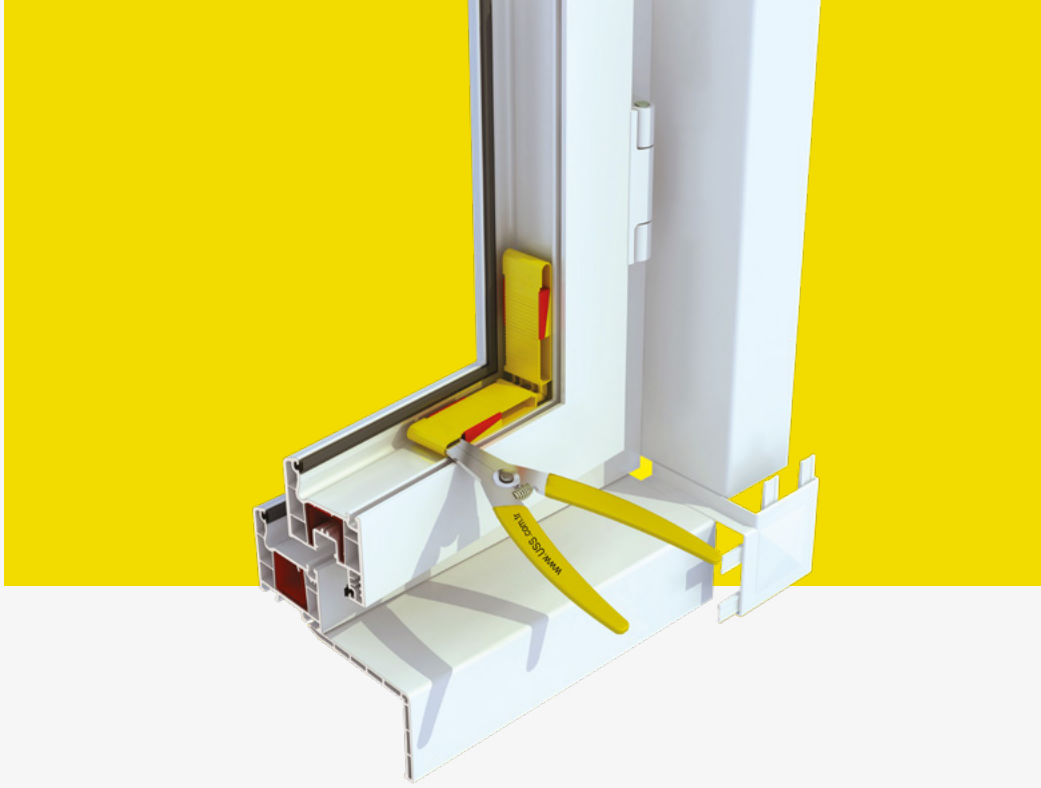

With the easy-to-operate transom sliding system, windows and balcony doors can be opened more easily. To open, the handle is automatically moved and then pushed to one side in a parallel position to save space. To close, the sash is automatically moved

again to the inclined and locked position. There is no longer any need to push and pull the sash at opening and closing time. Optimised bearing technology also ensures that this procedure is smooth.

Technical Details	Description
System Height	Maximum 2800 mm*
Wing Width	Maximum 1480 mm*
Glass Type	Insulating Glass/Single Glass
Carrying Capacity	Max. 100 Kg.
System	Semi-Automatic/Manual
Lock System	Optional
Sealing	%100

PARVAZMATİK

It is made of 100% first class product and 100% domestic capital.

The moulding corner turning accessory is the ideal solution for providing a decorative appearance at the moulding joints. In addition, this product eliminates the time loss caused by 45-degree cutting and joining process.

Technical Details	Description:
Colour	White/G.Oak/Anthracite
Width	6 cm
Length	9 cm
Depth	6,5 cm x 6,5 cm

ADJUSTABLE **GLASS WEDGE**

The Most Sensitive Glass Adjustments Made Easy!

Do not waste time with the old and difficult-to-apply methods you use for wedging door and window glass. USS Adjustable Glass Wedge offers fast, economical, trouble-free and permanent solutions with its practical structure. It also prevents sash sagging and glass breakage during installation. With USS Adjustable Glass Wedge, even the most sensitive glass adjustments are now very easy for you!

ANOTHER INNOVATION FROM USS STOPPER

It is made of 100% first class product and 100% domestic capital.

The stopper mounted on the opening wings helps to prevent accidents by putting an end to glass impacts. The wing stopper stabilises the wings so that the glass collected on one side is not affected by wind and impacts.
